EDUCATION

Master Degree in Computer Science

EPITECH

2008 - 2013

Epitech delivers a five-year program split in two parts: the first three years corresponds to a Bachelor in computer science and the last 2 years to expert in information technology.

The school has the particularity to teach with practical cases instead of theoretical.

Master Degree in Computer Science

Beijing Jiaotong University

2011 - 2012

Exchange program part of EPITECH cursus

PROFILE

As a seasoned Senior QA Engineer with over 10 years of experience, I specialize in software quality assurance, test automation, and agile methodologies.

My expertise spans across various industries, including web3, blockchain, and crypto technologies. I have a proven track record of designing and implementing robust test strategies, managing defect tracking, and ensuring high-quality software delivery.

Passionate about continuous improvement, I thrive in cross-functional teams and excel in mentoring and leading QA engineers.

WORK EXPERIENCE

Senior QA Engineer

Yield App

April 2023 - Present

Ensuring digital wealth solutions meet the highest standards of quality and reliability at Yield App.

- Experienced in all facets of quality assurance including test planning, test case creation, execution, and automation using industry-leading testing frameworks.
- Collaborating closely with cross-functional teams including developers and product managers to deliver robust products and enhancements.
- Instrumental in implementing best practices that enhance testing efficiency and accuracy, resulting in significant improvements in defect rates, test coverage, and release cycles.
- Committed to driving continuous improvement in QA processes to achieve exceptional product quality.

Lead QA Engineer

Sirius Tech

May 2022 - April 2023

Led a team of 5+ QA engineers in designing and implementing test strategies for one of the major mobile trading application in Thailand.

- Developed and executed comprehensive test plans and test cases to ensure that software products met quality standards and user requirements.
- Managed defect tracking and resolution, working closely with cross-functional teams to identify and address issues in a timely manner.
- Analyzed testing results and provided recommendations to improve the quality of the software development process.
- Mentored and trained team members, helping them grow and develop their skills.
- Worked closely with clients, developers, product managers, and project managers to ensure that software products were delivered on time and met user expectations.
- Identified quality assurance process bottlenecks and improvements

147/45, Ban Prompong condo
Sukhumvit soi 39, 10110, Bangkok

EXPERTISE

- Quality Assurance Processes
- Testing Tools and Technologies
- Software Development Life Cycle (SDLC)
- Agile Methodologies
- Project Management
- Cross-functional Collaboration
- Test Data Management
- Test Environment Management
- Regulatory Compliance
- Continuous Improvement

WORK EXPERIENCE

Lead QA Engineer

BRED IT Thailand

Jul 2019 - May 2022

Performed quality assurance in various projects, including functional testing (documents, GUI, web applications), technical testing (technical migration), and automation testing.

- Analyzed customer requirements and understood functional requirements to design test cases accordingly to be executed.
- Executed test cases within the test plan and created test reports to describe software evaluation, testing, and correction.
- Created detailed, comprehensive, and well-structured test plans and test cases for new or updated software projects.
- Worked with customers at all levels of business, demonstrating agility in day-to-day tasks and proactively solving problems.
- Led process improvement efforts by defining and setting standards for writing test cases using Gherkins languages.

Co-Founder & Project Manager

Dash Research Asia

Feb 2018 - Feb 2019

- Responsible for reaching out to universities to promote the Dash Research Asia internship program, selecting appropriate tasks for the interns, overseeing the timing and scheduling, and handling local regulations.
- The aim of Dash Research Asia is to enhance financial independence and prospects for all, and to create blockchain-enabled payment solutions that facilitate cryptocurrency accessibility for customers, merchants, businesses, and developers in Thailand.

Project Management Officer

Banque de France

Dec 2015 - Jun 2017

- Creating, maintaining and sharing a roadmap of all technical components used at Banque de France in order to keep track of their life cycles and prepare for future technical migrations.
- Aiding project managers of technical migration by defining the scope of their migrations, developing macro plans and managing communication with various impacted projects/products.
- Organizing and closely monitoring technical migrations upon request.
- Completed tasks of the Technical Migration Coordination Unit include managing current repositories, implementing monitoring for new components, executing communication activities, participating in the initiation of technical migrations, and monitoring of technical migrations.

WORK EXPERIENCE

QA Engineer

Metro Cash & Carry

Oct 2013 - Dec 2014

Responsible for maintaining software quality in METRO group's logistics operations.

Tasks include:

- Creating test scenarios and tracking defects.
- Guiding new feature development.
- Developing test assets and advising on business growth.
- Estimating workloads and overseeing test campaigns.

QA Engineer

LVMH

Oct 2012 - Aug 2013

Supporting desktop and mobile applications for Christian Dior Parfums, Guerlain, and Make Up Forever. Responsibilities include:

- Preparation and monitoring of tests.
- Execution of testing activities.
- Tracking and reporting bugs.
- Validating bug fixes.

ARNAUD BEAUDAT

SENIOR QA ENGINEER

TO WHOM IT MAY CONCERN,

Dear Hiring Manager,

I am excited to apply for the Test Engineer - Blockchain position. With over a decade of QA experience and a passion for blockchain technology, I am eager to contribute to your team.

At Yield App, I led the creation and implementation of comprehensive QA processes, significantly improving defect rates and release cycles. My expertise in test automation tools like Selenium WebDriver, Cypress, and Robot Framework ensures high-quality and reliable software.

Beyond my professional work, I actively invest in cryptocurrencies and use DeFi tools such as Metamask and Uniswap. This personal experience with blockchain technology gives me a unique perspective on the industry's challenges and opportunities.

I am confident my skills and passion make me a strong fit for this role. I look forward to discussing how I can contribute to your team.

Thank you for considering my application.

SINCERELY,

ARNAUD BEAUDAT
